

Lupane State University

Building Communities through Knowledge

NOTICE TO ALL STUDENTS

Modularization

The University would like to notify all students and stakeholders of the following:

- Lupane State University has adopted modular teaching and learning with effect from the First Semester of the 2023 Academic Year.
- The Modular learning model splits the semester into two halves and modules are divided into two (2) equal sets. This means students with maximum load of six modules will have to take the first three modules in the first half of the semester and sit for examinations. The other three modules will be taught and examined in the second half of the semester.

Registration

- Students shall register for all the modules at the beginning of the Semester.
- The calendar for Modular teaching and learning has been posted on the University website. Students must register before the commencement of the Semester for them to be able to access University amenities.
